

ALL AMERICAN DIRECT DRIVE CAN SEALER

Operation Instructions

! Never run sealer without can. Running without can inserted may cause damage to the machine.

1. Plug in Sealer and hold green button until it lights up. Then set selector knob to "auto."

2. Purge can with CO2 using the CO2 Purge Tower.

3. Fill can with beer of your choice. Fill to crease to avoid overflowing.

4. Place lid on can before you place it in Sealer.

5. Place can in Sealer. Guards will be open, adjusting handle will be all the way to the left (center).

6. Using the adjusting handle, lift raising mechanism to tighten can into machine.

7. Close plastic guards to ensure safety during sealing process.

8. Push green "Run" button to begin sealing process.

9. Open guards before trying to remove can.

10. Lower raising mechanism using the adjusting handle.

11. Remove can from Sealer.

12. Check cans for leaks, flip upside down to ensure it is tightly sealed.

! Never run sealer without can. Running without can inserted may cause damage to the machine.
