

Maintenance Guide

Lubrication: Food Grade Oil and Petrol-Gel

1. Food Grade oil will be your main lubricator.

2. Petrol-gels main lubrication points are on the gears.

Daily Maintenance Part 1: Cleaning

1. Removing Seam Rollers For Cleaning

Glass cleaner is very efficient against the grime build-up from beer on your seam rollers

Daily Maintenance Part 2: Lubrication

Seam Rollers (first and second)

Spin roller by hand to drain lubrication between elbow and roller

Weekly Lubrication Points (Direct Drive)

Seaming Lever Pins, Left and Right

Drive Shaft Oil Point

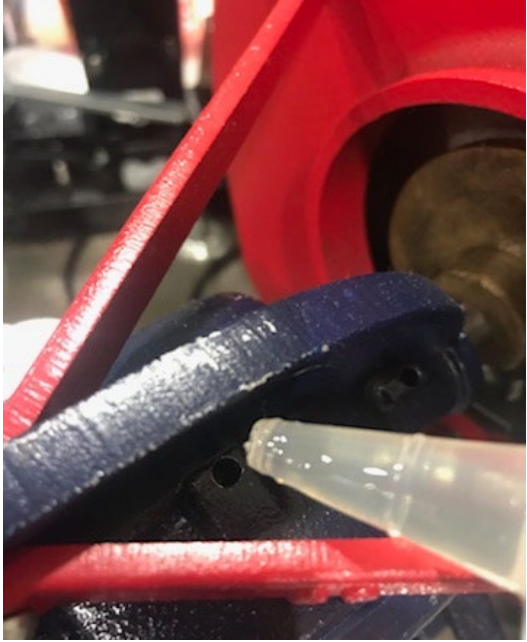

Weekly Lubrication (Standard)

Seaming Lever Pins Left and Right

Drive Shaft Oiling Points

Monthly Maintenance With Petrol-Gel

DO NOT OVER APPLY PETROL-GEL. ONLY CLEAN AND REPLACE GEL IF BLACK OR OVER GREASED.

Comments

- The Direct Drive Cam Roller is not featured in this power-point; however, it has a near identical design to the Standard showed in picture two of Slide #7
- Cleaning your seam rollers on a daily basis is the greatest factor in the protecting the lifespan of your machine.
